

Tumors

"Tumors gone in a week"

Sandy, our 3 year old Goldendoodle started to get a mysterious lump on her nose about a year ago. I took her to the vet who was clueless as to what the bump could be.

All three vets in the practice didn't know what could have caused that bump. We tried antibiotics, anti-inflammatories (2 kinds), but **nothing worked! So they referred me to a vet specialist who wanted to charge me \$2500.00** for an extensive work up including biopsies and an MRI.

I was devastated! Financially I just couldn't afford that, and because of that I was faced with potentially losing my dog. **By the way, the "specialist" never figured out what the bump was, but still presented me with a \$325.00 bill!**

Another vet tried another anti-inflammatory that seemed to work a little. Over the last few months my dog developed a strange lump on her lip that slowly grew to about 1/4", and several lumps under her skin on her body.

One lump was the size of a quarter on her side. The lump on her nose grew back, and was the size of a nickel and around 1/2" high. Two weeks ago I googled "dog tumors" and NuVet popped up.

After reading the glowing reviews I ordered it, thinking that ANYTHING is better than a \$2500 vet bill. We gave the supplements to Sandy now for a week exactly, (2 tablets a day) and I am here to tell you that the lumps are all GONE! After a WEEK!! I would have NEVER believed this!

Thank you so much NUVET! Now, do y'all make this in human formula?

Tumors

"Tumors Shrinking"

Our dog Sheeba is eight years old, she was operated on for tumors, and about 1 month afterwards the tumor began to reappear in her mouth.

I was told by our vet we would have to see an oncologist and radiation and surgery would be necessary. I read numerous testimonials about your Nu Vet Plus and we have begun our second bottle 2 weeks ago and I am happy to report the tumor is shrinking!!

I noticed about a month ago that her coat had a sparkle in the early morning sunlight when we are walking. Sheeba loves these wafers and I can say without reservation that your product is responsible. I will continue to give these to her. Thank You Again!!

Mass near Kidney and Heart

"Vet cannot believe Toby is still around"

I just have to say that I believe NuVet has saved my Chihuahua. Back in February I took my 9 year old Chihuahua Toby in to have his teeth cleaned, and asked the vet to take a look at his belly because it looked bloated. I received a call from her not long after I dropped him off saying that he had a huge mass, she said she had never seen one of that size in comparison to his size.

She did exploratory surgery and found the mass to be attached to his kidney and aorta and basically said there was nothing she could do for him. **I was told he may live for two weeks and that was pushing it. I brought him home expecting the worse.**

... I ordered a bottle and started giving it to him and my other Chihuahua. Not only is Toby still around today (9 months later), but he looks the best he has ever

looked. He no longer has eye stains, he has finally grown hair on his chest, which he has never had.

I went back to the vet to get his nails trimmed and she did an x-ray because she could not believe Toby was still around. The mass has actually shrunk to half the original size. He is now called the "Miracle Dog" at the vet's office.

Thank you NuVet, I feel like you have given me the greatest gift I could ever ask for!!

Cancer

"I just had to thank you so much for saving my baby!"

I just had to write, to let you know how GREAT NuVet Plus is!

My husband had gotten a few samples for one of our "babies" who has arthritis. As I was reading through the leaflet, I noticed it mentioned cancer and red blood cells. **My oldest dog, Sammy, has a red blood disease, and had recently been diagnosed with cancer.** She was only given until June to live. We're now at the end of July and not only is she still alive, but she's RUNNING, JUMPING, AND BARKING HER HEAD OFF!

I can't get over your product! I gave some to my mailman, and now he too is a regular customer. I shared it with my neighbor and she says her dog's eyes cleared up and is also able to run around (with arthritis).

I just had to thank you so much for saving my baby! I'm one of those crazy people that have birthday parties for my dogs! My husband and I love our dogs! Again, thank you so much.

Tumors

"Ear Tumor Gone"

My dog Max is a 12 year old German Shepherd. She had issue after issue with getting ear infections. I had her at the Vet every month for about six months.

The last time they noticed something blocking her ear canal and were going to try to remove it. They took an x-ray of the ear, **they could not remove it because it was a big tumor**, and there was nothing they could do. Eventually it would grow bigger and affect her balance and possibly her brain.

I was desperate to make her better. I found your product on the internet and ordered it right away. After a couple weeks on NuVet, I started seeing black like gunk in her ear. I cleaned it out again and again every week for about 10 months. Eventually the gunk stopped.

Last week I took her back to the vet for her yearly check-up. The doctor looked in her ears and said "all good" I said what about her tumor? Don't you remember the xrays? He said, her ears are fine and what did you do?

I told him about the NuVet and that he should sell it there for people that have animals with issues. He basically ignored me. I think it's because most vets only care about the money and not always the well-being of the animal.

Thanks so much for NuVet. It is such an unbelievable product.

Brain Cancer

"Diagnosed with Brain Cancer...After a couple days on your product my dog started walking again and his appetite picked back up to normal with a week."

My best friend of 12 years was diagnosed with brain cancer in November. My heart was crushed.

When we brought him home from the vet he started losing mobility in his hindquarters and would barely eat. Out of desperation I researched dog cancer info and found Nuvet. Thank God!

After a couple days on your product my dog started walking again and his appetite picked back up to normal with a week. He has begun to bark with our other dogs again and even feels the need to guard the yard.

He no longer seems to be in any pain and even played in the snow. Thank you so much for giving us a way to help him. We will keep our dogs on your product and are ordering Nuvet for our cat too.

Hemangiosarcoma

"After 6 weeks Tumors began to shrink away"

3 years ago our vet removed a bleeding tumor off of our Miss Piggy's abdomen. The test result was Hemangiosarcoma with clear margins. We were told her future was uncertain, but usually major blood organs were involved with this type of cancer and the prognosis was guarded.

Numerous other tumors began appearing all over her body. Our groomer suggested we try the [Nuvet Plus] canine vitamins. The tumors continue to appear but **after about 4-6 weeks of growth, they begin to shrink away.**

We continue to enjoy and laugh at our dog's antics as we are blessed with her good health these past 3 years and hope that we will have several more cancer-free years with her. Thank you for the production of this wonderful product.

Cancer

"Cancer Survivor loves the results"

I just wanted to thank you for making such incredible vitamins! I have a 10 year old boxer who is a 3 time cancer survivor.

I have been feeding him your NuVet plus vitamins for about 6 months now and I love the results that I see. His coat is shinier and super soft. **His appetite went from being barely there to constantly annoying me for more food. His energy level has increased and he is able to go to daycare now and play with the young pups!**

We have gone six months now without any new tumors popping up and we hope that this trend continues. My only regret is that I just discovered your vitamins, maybe some of the cancer could have been prevented. I have tried many, many products and have seen little to no results.

I feed an excellent diet consisting of raw and a superior kibble made in Canada. I truly believe a high quality diet and your vitamins can help our canine friends live a much longer and healthier life. Thank you and keep up the good work

Sincerely,

Debbie Holbert, OH
