

"twice as healthy and happy"

We have had our 2 Cocker Spaniels, George and Gracie, for 2 1/2 years now. We got them from a very good breeder up North who recommends your vitamin on her website and uses it with all her new pups. She recommended that we use the NuVet vitamin for at least the first year of their lives. We did. The dogs were always healthy, so we never thought that their good health might or might not have been attributed to your vitamin. After they turned 1, we decided to take them off of the vitamin.

That is when the problems began. Our little boy George was throwing up almost EVERY DAY. Doctors diagnosed him with a "sensitive stomach" and said that he just had a nervous constitution. He had runny stool all the time, he developed "hot spots" on his chest and tummy that turned red, itched and scabbed horribly. He was on antibiotics, scratching, having medicated baths, eating sensitive stomach dog food. We almost had him on Pepcid for his uneasy tummy as recommended by the doctor.

We were so frustrated and concerned for him and just did not know what to do. So I went back to my breeder's website and found the link to your vitamin. I read the symptoms that it was supposed to help and most of them sounded like George. So without hesitation, I reopened our account and ordered the 2 large bottles on auto ship. They arrived in ONE day!!!

Since re-administering your vitamin almost a month ago, George has NOT regurgitated even ONCE. **His stool is harder, his coat and hot spots cleared up IMMEDIATELY within a week. Both puppies have a renewed energy that had been missing for a while.**

They are good dogs from good stock, and we have had relatively few health problems with them. But since we have put them back on the vitamin, they are twice as healthy and happy and full of that original puppy spunk. We are SOLD 100% on the NuVet system after seeing these real life results in our dogs.

Thank you for putting out such a quality product.

"relieved to have found this 'Miracle drug'"

My Katie is a 2 year old Schnoodle who not too long ago, suffered from severe hot spots, hair loss and intense itchy skin. She literally would scratch herself until she was almost bleeding. Her condition began last May.

After countless visits to her vet and several rounds of antibiotics, and steroid shots we were recommended to a canine dermatologist. We had already spent hundreds

of dollars and really didn't think visiting a dermatologist would be helpful to our baby.

After weeks of researching the internet for a cure, I kept coming upon your site. This site would prove to be the best thing for "Katie". She began taking the supplements since mid January. **After 3 weeks, her intense scratching began to subside. Her hot spots began to turn pale pink rather than red. About 6 weeks into her treatment, her fur started to grow in.**

She has almost been on this amazing supplement for 3 months now. I'm literally in awe. She no longer has any hotspots, has completely stopped her scratching and you can no longer see her bare, fur-less patches as her fur has grown in. She is a much happier puppy.

I'm so relieved to have found this "Miracle drug". Thank you so very much for this lifesaver. I have since suggested this supplement to several of my friends who have dogs and cats.

"improvement in her skin condition within the first week"

Summer has arrived and my 12 year old Lab again has to suffer from "hot spots," which I'm afraid will kill her this year. She also has arthritis in one hip. A groomer suggested NuVet Plus, which my dog, Samantha, has been on for two weeks now.

I noticed an improvement in her skin condition within the first week. She's a happier dog now. **She's back to following me around on my farm, while before she was lethargic and just worn out from scratching.** She looks so good.

In her eyes she tells me that she's feeling much better. Thank you.
