

## ***"what a difference!!"***

My name is Guinness and I am a three year old Cavalier King Charles Spaniel. I was born with a genetic condition called Chiari Malformation. I was overweight and thirsty from the pills I got from my vet; I have these scary seizures that hurt and make me scream and howl. This was happening at least a dozen times a day.

I used to have no desire to run and play with my sister, Chloe. Chloe is 1 and a Cockapoo. My tail didn't wag much either. In addition, my joints were painful and frankly, I felt depressed. My owners were very concerned.

When Chloe came, she came with NuVet vitamins and she was "right as rain." My owners started me on them too... what a difference!! I didn't know if there is a connection or not, BUT I feel so much better there must be. **I have fewer "spells", I love to go out and play ball, I can run and jump without pain.** I have lost five pounds too. I not only feel better, but I look better; my coat is full and shiny and I am so much happier. My tail wags all the time.

My owners are so happy and grateful to NuVet vitamins... GO NUVET... thank you.

## ***"nuvet has surprised me once again"***

I have to say that nuvet has surprised me once again. I know what it can do but it is totally different to see the changes that I can make.

I do not know if you remember Alice with the toy poodle with the seizures. Well, her dog is not 4 lbs and doing awesome. **She no longer has seizures and she acts normal all the time.** I had the chance to groom her the other day and you should see the changes. The dogs coat is beautiful.

***"A wafer a day keeps the seizures away"***

I first purchased your product to help my Aussie Sparky because of lymphoma. But I really did not have enough time to see if it could work. But I also gave it to Buffy my Pomeranian that has seizures.

**I'm happy to report that the severity of her seizures has been not as severe or as frequent.** A wafer a day keeps the seizures away. Not original but works.

I also have a large Aussie 90lbs and 9 yrs old that loves to play Frisbee. He has been lately been limping after playing. But after giving him a wafer a day he is now not limping. And he is less skin irritation. Thanks to your product his quality of life has improved and he can enjoy life to its fullest.

***"seizures have almost stopped"***

My dog Duke is very special to me. He came to my Mommy's house before she died. I started feeding him, he became my dog. After my Mommy died I brought him home.

He started having seizures about a month ago. **After I bought him NuVet Plus the seizures have almost stopped, I have been giving him two a day one at morning and one at evening.** I missed a dosage yesterday, and he had a seizure last night. I will continue to give him two a day, so he will have no more seizures.

Thank you NuVet for helping my dog, he is our child to us.
